

Highest flexibility and best protection with the brand new ALL STAR laser safety goggle from LASERVISION

The brand new ALL STAR laser safety goggle is the new top model from LASERVISION. It is characterised by unique versatility and highest laser protection. Designed as the successor of the furthermore available and approved ECO frame, it has been significantly improved in many cases.

As an example the All STAR laser safety goggle features a highly efficient outside reinforcement. This reinforcement guarantees highest protection levels as well as an additional protection against scratches, when put on the table face forward. The reinforcement is available in blue and silver.

The ALL STAR can be optimised for industrial applications with a Shade Flip for welding use or for medical applications with a binocular magnifying glasses. Alternatively to the standard Duoflex-temple the goggle can be equipped also with an elastic strap, an adjustable head band or malleable temples.

Highlights:

- **For flat filters and filter combinations up to 12 mm thickness**
