

ECO (L-07) - economical and flexible

The frame style **ECO7** was designed to offer particularly economical eyewear for glass filters. Whoever likes smaller models will like the **ECO7**. The **ECO7** is available with almost all glass filters and even with custom made filters. The flexible Duo-Flex side pieces adjust to everybody's head shape in length and angle, and the soft ends prevent painful pressure, even after a long day. It does not fit over corrective glasses, but it offers an alternative.

Uniquely, this **ECO7** frame style can be fitted with the RX-insert. The RX-insert is a small, metal frame which can be fitted with prescription lenses by a local optician, and easily clipped into and out of the **ECO7**. Thus both prescription and laser safety eyewear can be combined into a single pair of glasses.
