

# VISION (L-05) - good vision and good looks

The model **VISION** is our most popular model for glass filters and coated plastic filters because it fits comfortably and can be individually adjusted. The flexible Duo-Flex side pieces can be adjusted in length and angle to everybody's head shape, and the soft ends prevent painful pressure on the ears, even after a long day. What makes the **VISION** so special is the curved filters (basic curve 5) which provide a wide field of view and a sporty look. Due to the curved lenses, it is not suitable for all filters. It does not fit over correction glasses.
